Market entry date
1.2.2013

General description of the product
Dog hygiene pants

Product features that are important for assessing safety
When choosing the materials and structures of the product, special attention has been paid to their durability and safety.

Information to show that the product is safe
The product does not pose a danger to the consumer or the dog under normal conditions of use. There is a risk of suffocation if the dog manages to tear off and eat parts of the product.

Ways to eliminate/reduce risks
Regularly check the product for signs of wear and tear, and replace it if any parts are damaged. The broken product must be repaired by the professional or replaced with a new product. Use only under supervision.

The effect that other products can have that are used together with the product
Carefully check that the product you intend to use together with the Hurtta product is safe, compatible and does not cause harm to the Hurtta product.

Guidance needed
Children and vulnerable consumers require guidance and supervision when using the product.
